Candidate-submitted response. The answers below were received through the 2026 candidate survey form and are reproduced as submitted, with only formatting changes. Publicly researched positions were not used. Publication does not constitute an endorsement by Wyoming Family Alliance Action.

1

1. Abortion is the intentional act of ending the life of another human being, while in the womb. Lawmakers should work to promote and protect the value of human life from conception to natural death, rather than further expansions of abortion access. (HB126-2026; HB42-2025; HB 148-2024)

RESPONSE Strongly Agree

I am a Christian and believe life is a precious gift from God. Human life in the womb is one of the most beautiful expressions of God's creation.

2

2. The danger of chemical abortion has been heavily researched (see EPPC study). Lawmakers should work to ensure that women are fully informed and receive a medical examination prior to receiving such drugs. (HB64-2025; HB117-2026)

RESPONSE Strongly Agree

Information and understanding of potential side effects and risks with all drugs is important. I've sat with a friend who experienced chemical abortion, her emotional pain was palpable and regret deep. I can't help but wonder if it had been a slower, more deliberated process, if she might have made a different choice.

3

3. Individuals and faith-based entities should have the right of conscience to freely live out their sincerely held convictions without fear of government infringement or retaliation. (HB 207-2025; SF 77-2025)

RESPONSE Strongly Agree

Absolutely!

4

4. Medical personnel should not be required to participate in any medical procedure or service that conflicts with the individual's sincerely held moral, ethical, or religious beliefs. (SF111-2023; HB143-2026)

RESPONSE Strongly Agree

We want all people to have the freedom to live up to the highest and best versions of themselves. Encouraging morality, ethical behavior and professional practices, and sincere faith positions creates in us the virtuous people our forefathers knew would be the type to allow true freedom and liberty for all mankind.

5

5. Lawmakers should protect minors by ensuring that government-funded spaces, including libraries and public schools, restrict access to sexually explicit content, while recognizing the right of parents to make decisions regarding their minor children's access to such materials. (HB10-2026)

RESPONSE Strongly Agree

Values are taught in the home and while our culture may be suffering at present, it does not take away from the rights of parents to guide these matters. We protect minors in many other ways within our legal system because of their youth. Why would we not protect them from adult level sexually explicit content at early ages?

6

6. Wyoming should recognize biological differences between men and women and protect girls' sports, locker rooms, and sex-designated spaces. (SF 44-2025; SF 62-2025; HB 72-2025; HB 32-2025; SF133-2023)

RESPONSE Strongly Agree

I am a Christian and believe God made man and woman distinctly and beautifully. The Scripture says we are fearfully and wonderfully made. The biological differences between men and women is part of God's distinct and beautiful design.

7

7. Lawmakers should support legislation that helps parents stand up to government entities that attempt to circumvent their rights in raising their children. (Sf 09-2024; HB 200-2025)

RESPONSE Strongly Agree

Parental rights are critical in raising our children and should only be restricted in the most serious cases of neglect, abuse, and abandonment. A parent's right to teach their faith, values, ethics, heritage, social and political views is a fundamental building block of freedom.

8

8. Lawmakers should allow education funding to follow the child and protect parents' freedom to choose public, public charter, private, or homeschool options. (HB 166-2024; SF 61-2024; HB 199-2025; HB 94-2025; HB 46-2025; HB 23-2026)

RESPONSE Strongly Agree

I believe competition has its place even within our education structure in this country. If funding follows the child, all types of education providers are incentivized to offer the best possible education and parent have the option to choose what will best serve their interests for their child. Along with this, however, I believe that measures of success are important to ensure that education is being achieved with each child that is a recipient of funding.

9

9. Lawmakers should support open enrollment policies that allow students to attend schools regardless of their geographic address. (SF 109-2025)

RESPONSE Agree

I have mixed feelings about this issue and can see both positive and negative outcomes from open enrollment. With our declining school enrollment due to population changes and a declining birth rate, I believe we have challenges in the future that may call this into question, too.

10

10. Lawmakers should ensure that public schools and post-secondary educational institutions do not seek to enforce DEI (Diversity, Equity, and Inclusion) mandates, which promote discrimination by dividing individuals into classes of “oppressed” and “oppressor.” (SF 103-2025; HB 147-2025)

RESPONSE Strongly Agree

The more we identify characteristics by which to evaluate an individual's "class," the more we weaken all human rights. The law has, over time, identified some true discriminatory practices based on characteristics like gender, race, religion, etc. These are important and I support true anti-discrimination laws. I believe we create discriminatory practices as we seek to enforce DEI mandates.

Candidate responses are shown verbatim except for typographic normalization needed for document rendering.
